

Ronald Nunes

Full Stack Developer

✉ ronaldnunes7792@gmail.com ☎ +5511944568433 📍 São Paulo, Brazil

Profile

I'm a **Senior Full-Stack Developer** with over **5 years** of experience designing, developing, and deploying scalable web applications using **JavaScript, React, and Node.js**. I have strong expertise in both front-end and back-end development, focusing on creating dynamic user interfaces and efficient server-side logic. I'm proficient in technologies like **React.js, TypeScript, Angular, Vue, Next.js, Node.js, Django, AWS, Docker**, and **CI/CD**. I excel at working independently and collaborating with teams to meet deadlines and exceed customer expectations through clear communication and effective teamwork.

Skill

Frontend: React, Next.js, Vue.js, JavaScript, TypeScript, TailwindCSS, Three.js, HTML, CSS

Backend: Node.js, Express.js, Nest.js, Django, Flask, FastAPI, Spring Boot, PHP, Strapi

Database: MongoDB, PostgreSQL, MySQL, Redis

Other: Git, AWS, Docker, GraphQL, Stripe, Agile methodology

AI Tools: Proficient with Cursor, Codeium, and Lovable for enhanced development workflows

Professional Experience

Magic Software Brasil

Jan 2024 - Present,

Full Stack Developer

- Develop and maintain full-cycle web applications using React, Node.js, TypeScript, and GraphQL
- Collaborate directly with clients to translate business requirements into technical specifications
- Implement performance optimizations that improved application load times by 40%
- Lead small development teams through agile sprint cycles, ensuring on-time delivery

Summatech Consultoria em Software Ltda

Mar 2023 - Dec 2023,

Full Stack Developer

- Built dynamic web applications with React, Node.js, and TypeScript for enterprise clients
- Integrated Tube technology to enhance data streaming capabilities across platforms
- Reduced API response times by 35% through code refactoring and database optimization
- Participated in code reviews and mentored junior developers

Y Brasil Smartsite

May 2022 - Feb 2023,

Front End Developer

- Developed responsive user interfaces using React, Material UI, and TailwindCSS
- Implemented serverless architecture solutions with AWS Lambda and API Gateway
- Created microservices using Docker and RabbitMQ for improved system scalability
- Built Web3-based applications to support decentralized finance initiatives

Education

Bachelor of Science in Information Technology,

2019 – 2021

Virtual University of the State of São Paulo

Coursework: Data Structures, Algorithms, Database Systems, Web Development,
Software Engineering
